DETAILED ACTION**Priority**

1. The priority information at the beginning of the application needs to be updated to reflect the status of all the files relied upon. There are also some inconsistencies in the information. See the attached Bibliographic Data Sheet.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 21-41 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-52 of U.S. Patent No. 6,677,013. Although the conflicting claims are not identical, they are not patentably distinct from each other because the two sets of claims are directed to essentially the same structure in which an adhesive material is added to one of the two layers. In the instant application, claim 23 states that the adhesive material is maleic anhydride, which is the same material recited in claim 1 of the allowed patent. The allowed patent states that the barrier material is EVOH or Nylon, and the instant application is more generic, but lists these materials in dependent claims (e.g. 26-29, 34, 35 etc...).

Art Unit: 1773

Claim Objections

4. Claim 23 is objected to because of the following informalities: The claim is missing a period. Appropriate correction is required.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure is listed on the PTO-892 attached to the office action.
